**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16 and 30-43, drawn to a method of classifying or categorizing a population by drug responsiveness, classified in class 702, subclass 19. If this Group is elected, then the below summarized specie election is also required.
- II. Claims 17-29, drawn to a method of predicting a drug response in an individual, classified in class 703, subclass 11. If this Group is elected, then the below summarized specie election is also required.

**SPECIE ELECTION REQUIREMENT FOR EITHER OF GROUPS I OR II:**

This application contains claims directed to the following patentably distinct species of the claimed invention:

Specie A: Beneficial drug reaction such as the alleviation of a sign or symptom associated with a condition as in instant claim 4

Specie B: Adverse drug reactions such as set forth in instant claim 3

The study and characterization of drug reactions primarily are directed to beneficial reactions such as in Specie A above, however, adverse, generally called side effects, are also of interest. These reactions, however, generally affect distinct biological molecules or systems in an individual being treated with a drug and thus are distinct subject matter thus documenting the undue search burden if they are searched together..

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 2, 5-16 and 30-43 (Group I) and claims 17-29 (Group II) are generic to the above species in each Group.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

The inventions are distinct, each from the other because of reasons set forth for the above species and as follows regarding the restriction groups listed above:

The inventions of Group I and Group II are broadly related regarding drug response but unrelated regarding the critical invention practice therein. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of Groups I and II have different modes of operation as Group I is directed to characterizing the present drug responses as related to populations of individuals whereas Group II is predictive is nature of the future usage of a drug.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
